

INPATIENT REHABILITATION

at MountainView Hospital

Inpatient Rehabilitation Unit at MountainView Hospital

3100 North Tenaya Way, Suite 600
Las Vegas, NV 89128
www.MountainView-Hospital.com

MountainView Hospital's inpatient rehabilitation unit is now open! We offer a variety of amenities, such as:

- **Continuum of care:** our acute rehabilitation unit is a department of the hospital, so you will be provided the same level of expert care that you have come to expect from MountainView. Additionally, your physician is able to continue to see you while in our rehabilitation unit.
- **Close to home:** the rehabilitation unit is located on the sixth floor of the MountainView Hospital Medical Office Building, making it even easier for family and loved ones to visit.
- **A beautiful, healing environment:** MountainView Hospital is the only inpatient rehabilitation

unit in the Northwest with all-private rooms *and* attached private bathrooms! Six stories up, you will enjoy majestic views of the Spring Mountains and the picturesque beauty of desert sunsets.

- **Immediate access to care:** in addition to our highly-trained rehabilitation staff, you will have 24/7 access to our physicians and emergency services should you need them, as well as a higher level of imaging services such as an MRI or CT scan. Unlike many free-standing rehabilitation facilities, we offer these services on-site so that you will not require an ambulance transfer to an outside facility.

For a personal tour of the unit, please contact our coordinator at **(702) 562-5560**. We hope you enjoy your stay with us!
